Roadmap for Russian Capital Crypto Project

Phase 1: Establishing the Foundation

Create the Website *(In Progress)*

- Develop an official website for the Russian Capital project to serve as the central platform for information, updates, and user interaction.
- Add features such as a news section, roadmap, contact page, and links to download associated applications.

Develop a TON Crypto Wallet *(In Progress)*

- Create a Telegram-integrated TON wallet that will support:
  - The Russian Capital token
  - The ONECOIN token
  - Tokens of partner projects
- Ensure a simple and secure functionality for users, including sending, receiving, and storing tokens.

Phase 2: Expanding Reach

Listing on DEX Exchanges *(Planned)*

- Launch Russian Capital and ONECOIN tokens on decentralized exchanges (DEX) to increase liquidity and accessibility.
- Initiate partnerships with other projects listed on DEX platforms.

Launch Marketing Campaigns

- Inform potential users and investors about the benefits of the Russian Capital ecosystem.
- Utilize social media, influencer collaborations, and crypto communities to establish a strong presence.

Develop Partnerships

- Collaborate with businesses and projects to integrate their tokens into the TON wallet.

- Strengthen the reputation of Russian Capital and ONECOIN as reliable and innovative partners in the crypto space.

Phase 3: Building a Complete Ecosystem

Develop a Payment System *(Planned)*

- Implement a proprietary payment system within the Russian Capital ecosystem.
- Enable users to make purchases and transactions exclusively using Russian Capital and ONECOIN tokens.

Launch a DeFi Platform *(Planned)*

- Create decentralized finance (DeFi) services, such as staking, lending, and yield farming, using Russian Capital tokens.
- Provide users with opportunities to grow their assets within the ecosystem.

Integrate NFTs and Gaming

- Develop NFT capabilities and gaming projects where Russian Capital tokens can be used.
- Encourage adoption by tapping into the rapidly growing blockchain gaming and NFT markets.

Phase 4: Becoming a Full-Fledged Crypto Bank

Create the Russian Capital Crypto Bank *(Planned)*

- Offer crypto banking services, such as savings accounts and payment cards linked to the wallet.
- Ensure that all transactions and services are exclusively conducted using Russian Capital tokens.

Expand the Ecosystem

- Build additional tools, APIs, and SDKs to integrate Russian Capital tokens into other platforms and services.
- Establish a global network of partners to enhance the utility and adoption of tokens.

Phase 5: Global Outreach and Sustainability

Host Annual Conferences and Events

- Organize events to unite crypto enthusiasts, developers, and partners, showcasing innovations and achievements.

Achieve Widespread Adoption

- Work towards the adoption of Russian Capital tokens by businesses and platforms worldwide.

Focus on Sustainability

- Implement eco-friendly blockchain solutions that align with global sustainability goals.
